

# A cloud doesn't have to cost the earth

## High-performing

Choose the specs to satisfy demanding workloads for a better developer and user experience.

## Affordable

Buy the right amount of resources you need through a global marketplace with competitive pricing.

## Sustainable

Consuming idle resources delivered by marketplace suppliers benefits the planet and your bottom line.

# A better choice for HPC

CUDO Compute puts you in control of your project resource needs.

## Why does hyperscale not meet customer needs?

Demanding applications

Distance degrades UX

Overpriced CPU/GPU

## How does CUDO Compute solve this problem?

Maximised-performance

Proximity boosts UX

Lower cost, right-sized

Freedom to choose the **right approach for you** by solving the challenges that hyperscale cloud and dedicated hardware can't.

## GPU Rental

Reserve or rent from a range of industry-leading cloud-based GPUs, from NVIDIA's top-tier H100 and A100 to A40 and A6000 series. You can reserve cutting-edge GPUs that are purpose-built for high-performance computing in many locations worldwide.

## CPU Rental

Not all processing tasks require GPU power! We offer a range of cloud-based CPU instances available in different locations worldwide and at a lower price on CUDO Compute Marketplace.

## Virtual Machines

Our virtual machines offer a balanced mix of performance, customisation, and ease of deployment. Get anything from general-purpose to CPU or GPU-optimised virtual servers that are configurable, scalable, and don't cost the earth.

## Storage

Integrate your virtual machine workloads with S3-compatible object storage volumes. Designed to store, access and recover any application data for a range of use cases, including HPC workloads and cloud-native applications.

## Networking

Get networking performance and security for your demanding workloads. Our private networking solution abstracts the complexity of network configuration, allowing you to manage private cloud networks, virtual routers, and security groups in the UI.

## Billing & Management

CUDO Compute's Billing Account provides various billing and cost management tools, making it easy to manage your cloud resource consumption. It allows you to estimate cloud costs, create budgets, and visualise your spend with automated reports.

## Security & Automation

Your security is our top priority. CUDO Compute gives you access to a range of robust API security and automation tools to enhance platform security, streamline workflows and improve operational efficiency.
